

meridol System

In the GABA image archive you will find pictures of the GABA products and their use. They are freely available to the press for reporting in connection with GABA products. The pictures may neither be commercially used without GABA's consent nor may they be altered. You can download the images as a print version (CMYK, 300 dpi) or as a version for electronic use (RGB, 72 dpi) as *.zip files.

meridol system

meridol promotes the natural regeneration of irritated gums. Its efficacy is based on the unique combination of active ingredients amine fluoride/stannous fluoride.

meridol toothpaste

Regular removal of dental plaque protects against inflammation of the gums. During brushing meridol toothpaste deactivates plaque residues and lastingly inhibits the formation of new plaque. It thus supports prevention of and can even regenerate irritated gums.

meridol mouthrinse

Amine fluoride/stannous fluoride inhibits the growth of harmful bacteria, and in meridol mouthrinse it penetrates to the places not reached by the toothbrush. Thanks to its good tolerance meridol mouthrinse is suitable for long-term prevention of inflammation of the gums.
