

elmex Children System

In the GABA image archive you will find pictures of the GABA products and their use. They are freely available to the press for reporting in connection with GABA products. The pictures may neither be commercially used without GABA's consent nor may they be altered.

elmex Junior system

The new permanent teeth of seven- to twelve-year-olds are at particular risk of caries. The elmex Junior system offers specific protection against caries for this age group.

elmex Junior toothpaste

Thanks to a fluoride content and taste appropriate to the age range and gentle cleaning as a result of an optimum combination of cleaning agents, elmex Junior toothpaste with amine fluoride offers efficient protection against caries for the porous and still soft dental enamel of seven- to twelve year olds.

elmex interX Junior toothbrush

The elmex interX Junior toothbrush is the ideal complement to elmex Junior toothpaste. Its crossed, higher bristles clean down into the interdental spaces, which are particularly susceptible to caries.

elmex children's system

Milk teeth need special care. elmex children's toothpaste and the elmex training toothbrush combine to form an optimum system for daily oral hygiene from the eruption of the first tooth.

elmex children's toothpaste

Even at a low concentration amine fluoride builds a fluoride depot on the tooth surface. elmex children's toothpaste with its child-adapted, reduced fluoride concentration thus protects the milk teeth particularly effectively against caries.

elmex training toothbrush

The small, rounded brush head of the elmex training toothbrush with its soft, shortened bristles ensures gentle but thorough cleaning of the milk teeth extending to the rear molars. At the same time the ergonomic handle facilitates the fist grip preferred by children and the guiding hand of an adult.
